Please provide the best contact number to be reached at in the above Phone Number field of the " ORDERED BY" section.

The CDS software has been validated and approved to work on the Panasonic Toughbook CF-20 Laptop and Panasonic Toughbook CF-54 Laptop that are configured by Bosch Automotive Service Solutions. Mercury Marine and Bosch Automotive Service Solutions have not tested the CDS software in conjunction with other diagnostic hardware and software applications. Loading CDS software on other hardware may create driver configurations and other conflicts preventing CDS and possibly other applications from working properly. Therefore, the dealer is responsible for resolving potential hardware/software conflicts that may arise as a result. We recommend CDS be loaded on a PC that is configured through Bosch Automotive Service Solutions to experience the full potential of the program and to avoid the costs and time involved in resolving potential issues.

PC Minimum Specifications

WIN7 Pro or WIN10 Pro
***CDS will not run on the Vista Operating System**
1.2 GHz Pentium Processor
2 GB RAM
120 GB Hard Drive
